

Window Blinds

Casement, Awning & Picture Windows

You'll never have to dust your blinds again!

Lindsay's casement, awning and picture windows are available with mini-blinds. These blinds can either be contained in the IG Unit (the blinds are in the sealed glass), or contained by a separate removable panel of clear glass. Blinds contained in the IG Unit are available with optional argon gas but Soft Coat Low E is not available. Blinds contained by the separate removable panel of clear glass have all of the regular glass options available to these windows.

The window blinds have tilt and raise/lower mechanisms. This means that you can tilt the blinds, and raise or lower them. The moveable finger slide device makes adjusting the slats convenient and simple. Due to the blinds unique control of infrared energy and UV radiation, sun damage to fabrics, furniture and flooring ceases to exist when blinds are closed. The inside glass panel can be easily wiped and cleaned without affecting the blinds. Because the blinds are internally mounted, damage to the blinds from everyday use is avoided. The screen must be removed to operate the blinds.

The blinds and glass are covered by a 10-year warranty when blinds are in the IG. Lifetime glass warranty is available on the IG unit when the blinds are concealed by the glass panel. The blinds themselves are only warranted for 10 years. Blinds are not warranted for maintaining "levelness."

Lindsay's blinds are available in White (0102), Off White (0125), Almond (0149), Gray (0155), Tan (0069), Silver (0157) and Gold (3000). All blinds use white hardware. Visit www.oemshades.com to view color options.

Moving the operator at the top to the left or right will tilt the blinds. Moving the operator on the side up or down will raise or lower the blinds.

2030 Patio Door Blinds

You'll never have to dust your blinds again!

Lindsay's 2030 Patio Door is available with mini-blinds contained in the IG Unit (the blinds are in the sealed glass). Blinds are available in patio doors up to 78" wide with clear glass and optional argon gas. Soft Coat Low E is not available.

Patio door blinds have tilt and raise/lower mechanisms. This means that you can tilt the blinds, and raise or lower them. The moveable finger slide device makes adjusting the slats convenient and simple. Due to the blinds unique control of infrared energy and UV radiation, sun damage to fabrics, furniture and flooring ceases to exist when blinds are closed.

The blinds and glass are covered by a 10-year warranty, and the lifetime glass warranty is not available on these IG units. Blinds are not warranted for maintaining "levelness."

Patio Blinds are available in White (0102), Off White (0125), Almond (0149), Gray (0155), Tan (0069), Silver (0157), and Gold (3000). All blinds use white hardware. Visit www.oemshades.com to view color options.

Moving the operator at the top to the left or right will tilt the blinds. Moving the operator on the side up or down will raise or lower the blinds.
