

Clear View Screen

Standard Screen Mesh

- The standard screen mesh does not allow for as much air and sunlight to pass through because the screen uses a larger fiber strand.
- Our standard screen mesh meets and/or surpasses all industry standards.
- **Standard** screen mesh is included in the price when you purchase a Lindsay Window that would normally come with a screen.
- Charcoal Color

Clear View Screen Mesh

- Allows 50% more light through than the standard screen mesh.
- Uses a much finer gauge of fiberglass strand than the standard screen mesh.
- The Clear View Screen Mesh has more strands providing a tighter weave that keeps the bugs out.
- There are currently no industry standards for this type of screen, but the Clear View Screen Mesh does meet and/or surpass all of the same standards as our Standard mesh.
- **Optional** for all windows.

Clear View Screen

Increased Visibility

This Clear View Screen Mesh will allow 50% more of the natural sunlight through, and also gives room for more air flow through the screen.

Increased Curb Appeal

The Clear View Screen is harder to see from the exterior of your home. The curb appeal of your home is easily enhanced with the use of the Clear View Screen Mesh.

Pricing

The standard screen mesh is included in the cost when ordering a Lindsay Window that would normally come with a screen. Clear View screen mesh is optional and additional charges may apply.

Maintenance & Cleaning

A high-pressure washer cannot be used on the Clear View Screen mesh. To clean your Clear View Screens, simply use a sponge or soft scrub brush and a mild soap. Then, gently rinse clean with water.

Durability

The Clear View Screen Mesh is thinner but more dense than the standard screen mesh, and meets all of the same industry standards that the standard screen mesh does. Clear View Screen surpasses the industry minimum requirements for Tensile Strength and the Mullen Burst Test. *(Please call to see the test results)*
