

Lindsay Windows

Since 1947, Lindsay Windows has provided energy-efficient, durable windows to the Midwest. Manufactured in Minnesota, Missouri and Illinois, our windows are designed to endure harsh winters to humid summers.

Like an engine in a car, some of our features are “under the hood.” Our vinyl, glass and hardware provide your windows with features that you

can't see, but make a difference in the durability and long-term value of your home.

SunView Windows by Lindsay are the best overall value to you as a homeowner for years to come. Thousands of customers since 1947 have enjoyed our products and you will too.

Attractive Appearance

The SunView vinyl window is designed to enhance the appearance of your home. Our maintenance free vinyl will retain its color for years to come. Our windows prevent you from ever having to paint or stain them. While our windows have a great look, we don't sacrifice on performance or appearance. The multichamber extrusion adds to the durability and energy efficiency of these windows.

Low Maintenance, Smooth Operation

The SunView double hung and single hung windows tilt in for easy cleaning. The sliders have an easy sash removal system while the casements have special hinges allowing you to easily clean the outside glass. For easy operation, we use high quality hardware that provides smooth, consistent opening and closing for maximum durability. With 100% vinyl, SunView Windows are virtually maintenance free. The vinyl extrusion provides a great sheen for withstanding dirt and grime.

Don't overlook the importance of quality windows in your home. Look for the details in the SunView line from Lindsay Windows to enhance your home for a lifetime.

“25 Year Limited Warranty”**

LindsayWindows has a leading edge warranty that will provide you with peace of mind for as long as you own your home. The basic window unit has a 25 year warranty that basically covers everything including hardware, etc from any defect under normal use. The glass package has a 25 year warranty against seal failure and a year on stress cracks. You also have the option of adding Lifetime GlassWarranty coverage which covers the cost of the glass due to any kind of breakage, accidental or not.

Our Commitment to Quality

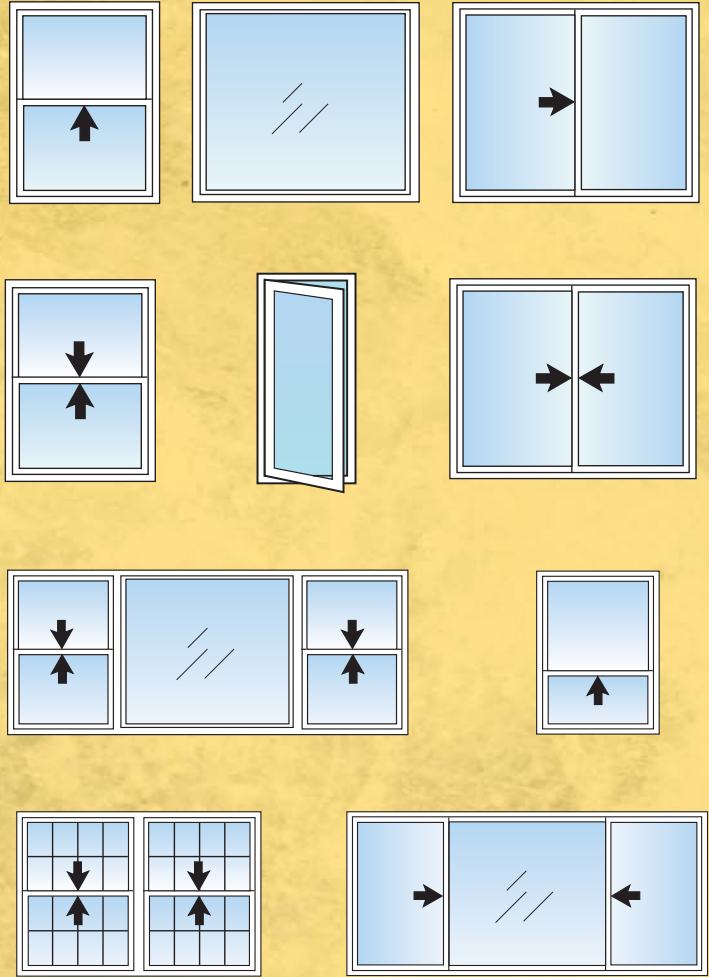

SunView Windows are fabricated under strict guidelines by a nationwide network of licensed manufacturers. All vinyl components meet or exceed performance requirements established, certified, and monitored by the American Architectural Manufacturers Association.

The Differences Are In The Details

ENERGY STAR Approved

SunView windows will help reduce your energy bills and prolong the life of your furnace and air conditioner. Because our windows exceed ENERGY STAR standards, you will save more on your energy bills! With argon gas in between the glass panes, the window is even more insulated. Your new SunView windows will reduce your energy consumption. Help the environment and be more comfortable with your SunView windows.

Reduce Noise, Stay Comfortable

SunView windows are designed using the non-metal spacer between the glass. This helps reduce the outside noise from coming into your home. You'll find you can keep your windows coverings open longer, enjoy the view instead of just covering it up. Avoid chilly drafts in the winter and excess heat in the summer with energy efficient SunView vinyl windows manufactured by Lindsay Window & Door LLC.

LowE is the New Standard

SunView windows come standard with soft coat LowE glass. The glass is designed to protect your furniture, carpet and other interior items from fading.

LowE glass also helps in the energy efficiency of your new windows. This silver coating increases energy ratings to not only save you money on energy bills but also reduce harmful sun damage.

Optional Glass

Obscure glass is commonly used in bathrooms to distort the image behind. Choose from these options

Aqua

Standard Obscure

Rain

Tempered Glass

Often used in bathrooms, stairways and windows close to the floor or a doorway, tempered glass is similar to a car windshield so it will not shatter if broken. Check your local building code for any windows requiring tempered glass.
