WHY VINYL

Vinyl windows are built to last — they don't rot, warp, or peel like wood, and they won't corrode like metal. Lindsay vinyl frames are made from durable, energy-efficient material with a honeycomb structure that adds strength and insulation. They require little maintenance, resist fading, and deliver long-term value without repainting or refinishing. Designed for performance and comfort, vinyl offers the best combination of beauty, efficiency, and reliability for any home.

*Inspired
by nature*

DOUBLE HUNG

The most popular style among homeowners, Pinnacle double hung windows combine timeless beauty with reliable performance. Both sashes tilt inward for easy cleaning and versatile ventilation while providing excellent protection from the elements.

Reinforced Locking Rail
Increases structural strength and maintains proper sash alignment over time

Dual Tech Lock
Sleek design with no visible tilt latches — unlocks and tilts in one easy motion

FEATURES

- ▶ Both top and bottom sashes tilt in for easy cleaning
- ▶ Triple weatherstripping minimizes drafts and noise
- ▶ Foam-enhanced frame and sash improve energy efficiency
- ▶ Magnetically sealed weather stripping
- ▶ Integrated sash vents standard; optional WOCDs available
- ▶ Foam blocks for added comfort

Design Features
Magnetic Weatherstrip, Foam Filled Frame, Telescoping Sill Dam

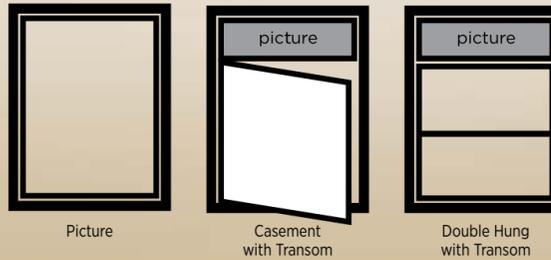

PICTURE

Create a bright, open view with Pinnacle picture windows. Their fixed design maximizes natural light, delivers energy efficiency, and brings a clean, modern look to any room.

FEATURES

- ▶ Optional vinyl divider bar for the look of a double hung
- ▶ Clean, unobstructed views with a fixed sash design
- ▶ Ideal for large openings and expansive picture window configurations

Picture Casement with Transom Double Hung with Transom

SLIDER

Sleek and practical, Pinnacle slider windows glide open with ease, offering lasting durability, excellent ventilation, and wide-open views.

FEATURES

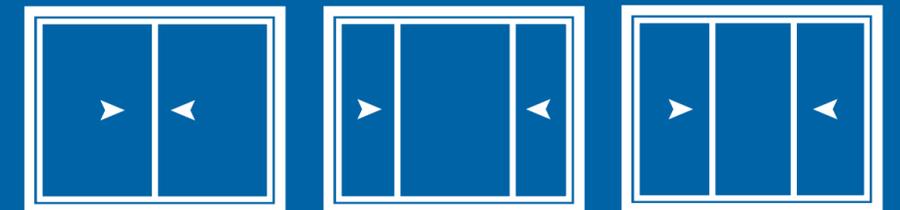

- ▶ Triple weatherstripping reduces drafts and air infiltration
- ▶ Available in 2-lite, 1/3-1/3-1/3, and 1/4-1/2-1/4 configurations
- ▶ Removable sashes for easy cleaning

Double Slider

3-Lite Slider

2-Lite Slider 1/4-1/2-1/4 Configuration 1/3-1/3-1/3 Configuration

SHAPES

Make your home unique with geometric windows. A variety of special shapes and window configurations are available, including:

FEATURES

- ▶ Circle
- ▶ Arch Top
- ▶ Octagon
- ▶ Ellipse
- ▶ Half Round
- ▶ Trapezoid
- ▶ Quarter Round
- ▶ Custom Shapes

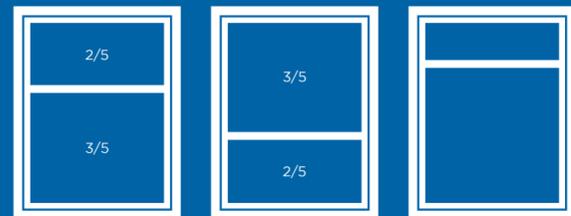

CIRCLE HALF ROUND OCTAGON ELLIPSE

MEETING RAIL OPTIONS

By specifying the lock rail height during ordering, you can achieve architectural looks that enhance your home's design.

COTTAGE ORIEL CUSTOM

CASEMENT

Casement windows deliver the lowest air infiltration of any operable design, with expansive views, smooth operation, and dependable strength. Contour styling completes the look.

FEATURES:

- ▶ 90° opening for easy cleaning from indoors
- ▶ Triple weatherstripping for superior efficiency
- ▶ Multi-point locking system for added security
- ▶ Optional between-the-glass blinds
- ▶ Optional egress hardware for safety
- ▶ Optional center bar for a double-hung appearance

See page 8 for full details on colors, woodgrains, ornamental hardware, and blind options.

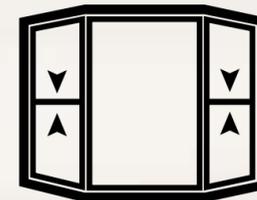

BAY/BOW

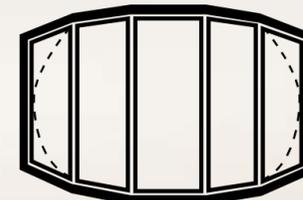

Bring in natural light, expand your living space, and add architectural elegance with a custom bay or bow window. These designs transform the look and feel of a room while enhancing curb appeal and home value.

FEATURES:

- ▶ Mix of operable and fixed windows for style and function
- ▶ Narrow frames maximize glass area and views
- ▶ One-piece construction for strength and energy efficiency
- ▶ Seat board choices: oak, maple, or laminate
- ▶ Insulated mulls and panning protect against water intrusion
- ▶ Bay windows feature a large center picture window with operable casement or double-hung flankers

Bay Window with Double Hung

Five Wide Bow Window

Insulated Head/Seat Boards

Bay and bow windows are available with an optional insulated head and seat board for added warmth. Available on bays and bows up to 10 feet.

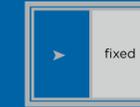

Weather Tight Construction

Units are sealed with silicone and foam insulated for the tightest seal possible.

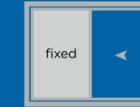

FREEDOM PATIO DOOR

2, 3 & 4 PANEL DOORS

With optional sidelites and transoms. Ask your dealer for details.

2-Lite Patio Door

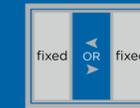

2-Lite Patio Door

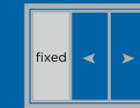

3-Lite End Operator

3-Lite End Operator

3-Lite Center Operator

Signature Handle with Lock

2-Point Locking System

Foot Lock

Roller Track

AWNING

Let in fresh air rain or shine. Awning windows open outward from the top, allowing for larger architectural sizing and a tight, weather-resistant seal.

HOPPER

Hinged at the bottom and opening inward, hopper windows are ideal for basements or smaller spaces that need ventilation and natural light.

GLASS PACKAGES

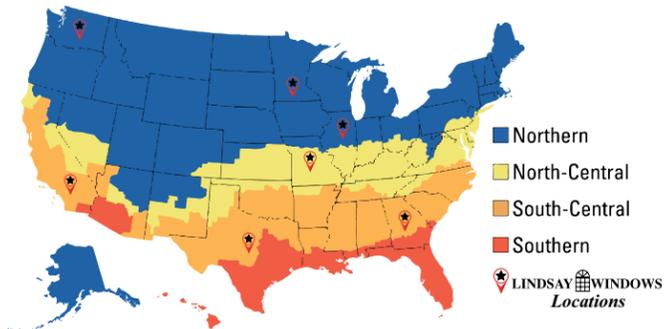

ENERGY STAR® 7.0

Our insulating glass combines Low-E coatings and gas-filled chambers for balanced energy performance, comfort, and clarity. ENERGY STAR® packages are available at all Lindsay Windows locations and may qualify for rebates and tax credits.

Note: A complete list of ENERGY STAR® Climate Zones by state and county or, where applicable, zip code is available by visiting Energy Star® by scanning this QR code:

- Triple-glaze is available with any glass combination and provides improved U-values across all glass packages, while also helping reduce sound (STC).

- STC glass options are also available. For more information, please ask your sales representative.

STC = Sound Transmission Coefficient

GLASS PACKAGE NUMBER GUIDE

The numbers in our glass-package names help indicate coating layers and light performance:

- ▶ The first digit (such as 1 or 2) refers to the number of Low-E coating layers
- ▶ The second two-digit number (such as 80 or 70) refers to visible light transmittance
- ▶ 80 = approximately 80% visible light
- ▶ 70 = approximately 70% visible light

This allows you to balance daylight, solar control, and energy performance based on your needs.

LoE-i89™ is a fourth-surface coating that reflects escaping heat back into the room to improve energy-efficiency. It can be added to any of the LoE coating options below and is easy to clean, with no haze or tint to obstruct the view.

LoE-180™ features one Low-E coating and offers higher solar heat gain, making it a popular glass option for colder climates.

LoE-270™ features two Low-E coatings and is one of the industry's most popular options, offering higher light transmittance while still providing effective solar control.

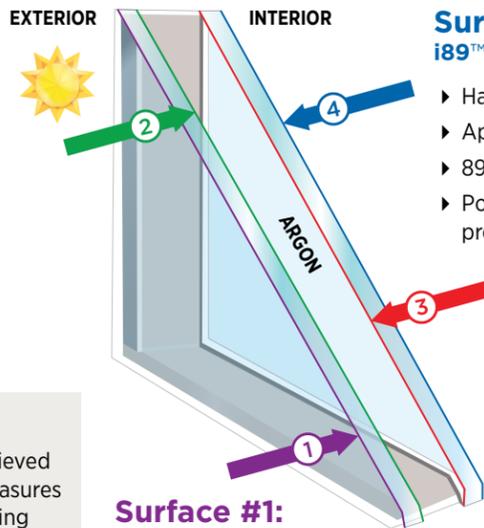

LoE-366™ with Neat+™ features three Low-E coatings for exceptional solar heat-gain performance and includes Cardinal's Neat+™ glass. Neat+™ uses static dissipation to reduce dust on the window's surface and, with help from sunlight, breaks down organic pollutants to keep the glass naturally cleaner.

Quad 452+™ features four Low-E coatings and offers the lowest emissivity currently available. With a solar heat gain coefficient (SHGC) of 0.22.

Surface #2:

- 180**
1 Layer of Silver 80% Visible Light
- 270**
2 Layers of Silver 70% Visible Light
- 366**
3 Layers of Silver 66% Visible Light
- 452**
4 Layers of Silver 52% Visible Light

Surface #4: i89™

- ▶ Hard Indium reflective coating
- ▶ Appears clear
- ▶ 89% Visible light
- ▶ Positioned on the inner surface of the home's glass, promptly reflecting energy back into the living space.

Surface #3: Natural / Clear

SHGC (Solar Heat Gain Coefficient)
In Southern climates, lower SHGC values help reduce unwanted solar heat gain. For the Northern region, a higher number allows heat to enter into the home which reduces heating costs.

U-Value

Optimal energy retention is achieved with the lowest number. This measures inside temperatures from escaping to the outside.

Surface #1:
*NEAT+™ repels dirt/residue on the window's surface.

GLASS DESIGN OPTIONS

GRID PATTERNS

Add character to your home with distinctive grid options. GBG (Grids Between the Glass) provide a smooth surface for effortless cleaning, while SDL (Simulated Divided Light) creates an authentic architectural or historical look.

lindsaywindows.com

At Lindsay Windows, we are committed to environmentally responsible manufacturing and operations. Our vinyl windows are energy efficient, recyclable, and designed for a long life cycle that reduces waste. We promote energy-saving practices and environmental awareness across all facilities, a commitment recognized with the Waste Wise Leader Award.

*A tradition of quality
since 1947*

Lindsay Windows began in 1947 as a privately held, family-owned company. Nearly 80 years later, that same commitment remains at the core of everything we do. Our mission has always been to manufacture high-quality window and door products using advanced materials, modern manufacturing equipment, and proven processes.

Today, with seven manufacturing locations strategically positioned across the United States, we are able to serve builders, remodelers, and homeowners with consistent quality, reliable lead times, and products tailored to regional needs. Our windows are distributed through a trusted network of qualified dealers and are backed by extensive industry certifications.

All Lindsay Windows products meet or exceed current ENERGY STAR® standards and are engineered to deliver exceptional performance, durability, and long-term value. We take pride in our people—each employee plays a role in upholding our standards and supporting our customers.

Our pricing reflects a commitment to craftsmanship, energy efficiency, and dependable warranties—offering one of the best values in the market. With decades of experience behind every product, Lindsay Windows continues to build trust one window at a time.

Thank You,

The Lindsay Team
